CAREER SUMMARY:

An efficient problem solver and dedicated team player with a strong passion for transforming ideas into reality through the power of modern technology. I thrive in collaborative environments where creativity and innovation drive progress, and I take pride in developing practical, high-quality solutions that make a meaningful impact.

WORK EXPERIENCE:

Customer First Distribution Inc.

IT Auditor | February 27, 2025 – May 03, 2025

- Prepared detailed audit reports and present findings to management.
- Evaluated access controls to prevent unauthorized data access in systems related to inventory, shipments, and supplier information.
- Collaborate with IT, warehouse operations, and accounting teams to implement audit recommendations.
- Prepare audit reports detailing findings, risks, and remediation plans.

PROJECTS:

AI-Powered Finance Tracker | <https://ai-powered-quanta.vercel.app>

I developed a Finance Tracker web application designed to help users efficiently manage their income, savings, and financial goals. The platform features an intuitive and user-friendly interface, enabling users to easily record and track their financial activities. I also integrated real-time data visualization tools to provide users with clear insights into their spending habits and progress toward their goals. Additionally, the system is powered by the Qwen:4B AI model through Ollama, allowing users to interact with an intelligent AI.

Personal Portfolio | <https://lmxdev.vercel.app>

I built a personal portfolio website to showcase the projects I developed while learning various modern web technologies. The portfolio was created using React, TypeScript, and Tailwind CSS, enabling rapid and efficient development with clean, maintainable code. I designed an engaging landing page with an intuitive user interface and a modern, visually appealing aesthetic to effectively highlight my skills and projects.

Enterprise Grade Inventory Management System | <https://egquantify.vercel.app>

Developed an enterprise-grade Inventory Management System designed for scalability and reliability. The platform provides real-time tracking of stock levels, inbound and outbound movements, audit logging of all transactions, and automated alerts for low inventory thresholds. It supports multi-location warehouses, role-based access for staff and clients, and advanced reporting dashboards for demand forecasting and supply chain optimization. The system delivers a dynamic, responsive interface with accessibility features, ensuring seamless user experience across devices.

CERTIFICATIONS:

2nd Runner up Web Development Competition at STI College Ortigas-Cainta | November 2024

EDUCATION:

2021 – 2025 | STI College Ortigas-Cainta

Bachelor of Science in Information Technology

SOFT SKILLS:

- Self-motivation
- Problem-solving
- Teamwork and collaboration
- Adaptability
- Time management
- Attention to detail

TECHNICAL SKILLS:

Programming Languages:

- C#
- Javascript/Typescript
- Java

Web Development

- HTML
- CSS
- React
- Redux
- Node/Express.js
- Jest
- GraphQL
- ASP.NET Core

Other tools:

- Docker for Containerization
- VS Code for Code Development
- Figma for Design and Prototyping
- AWS for Cloud Storage
- Postman for API Testing
- Vercel/Render for App Deployment

Databases:

- MongoDB
- MySQL

Version Control:

- Git
- Github
